

Created By Vaibhav Patel

Once all files Extracted.

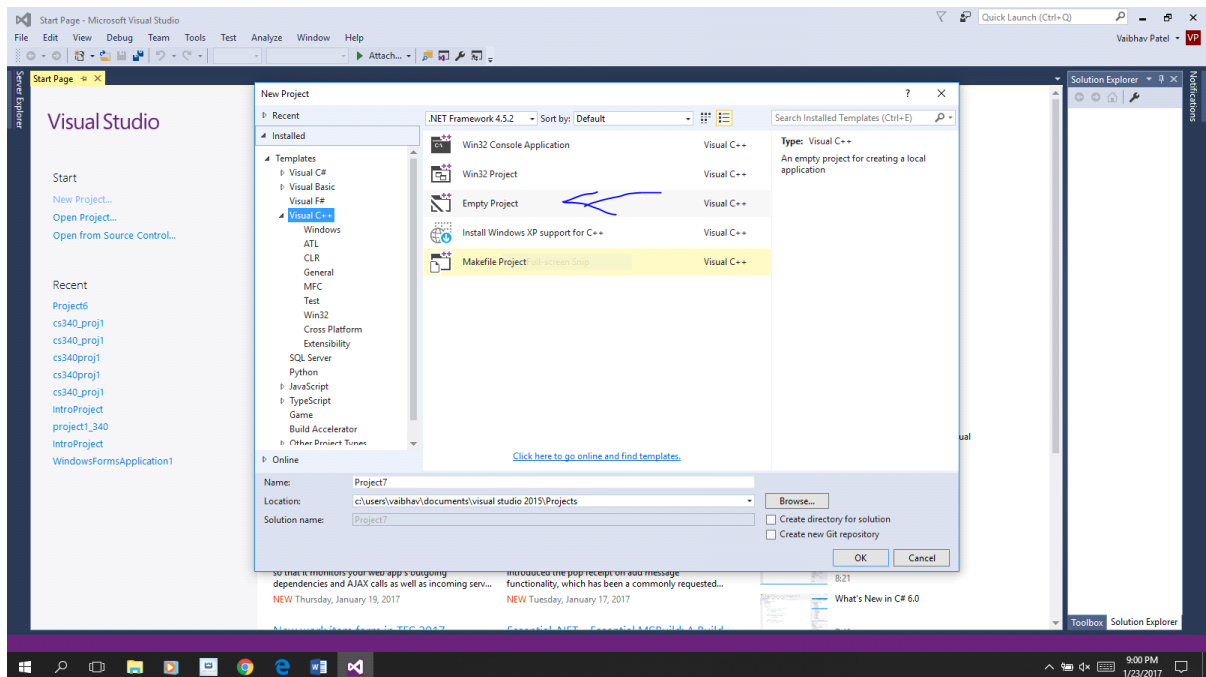

1. Open cs340_proj1 folder, which contains Visual Studio 2015 c++ solution and text files.
2. Double click on cs340_proj1.sln file which is Microsoft Visual Studio Solution.
3. Run the program and follow the instruction for further execution.
4. All my code is in sorting.cpp file.
5. All text files must be in the same project folder.
6. There is no coding error. All code is tested in different machines.
7. All Output files will be generated in the same project folder.

Warning:

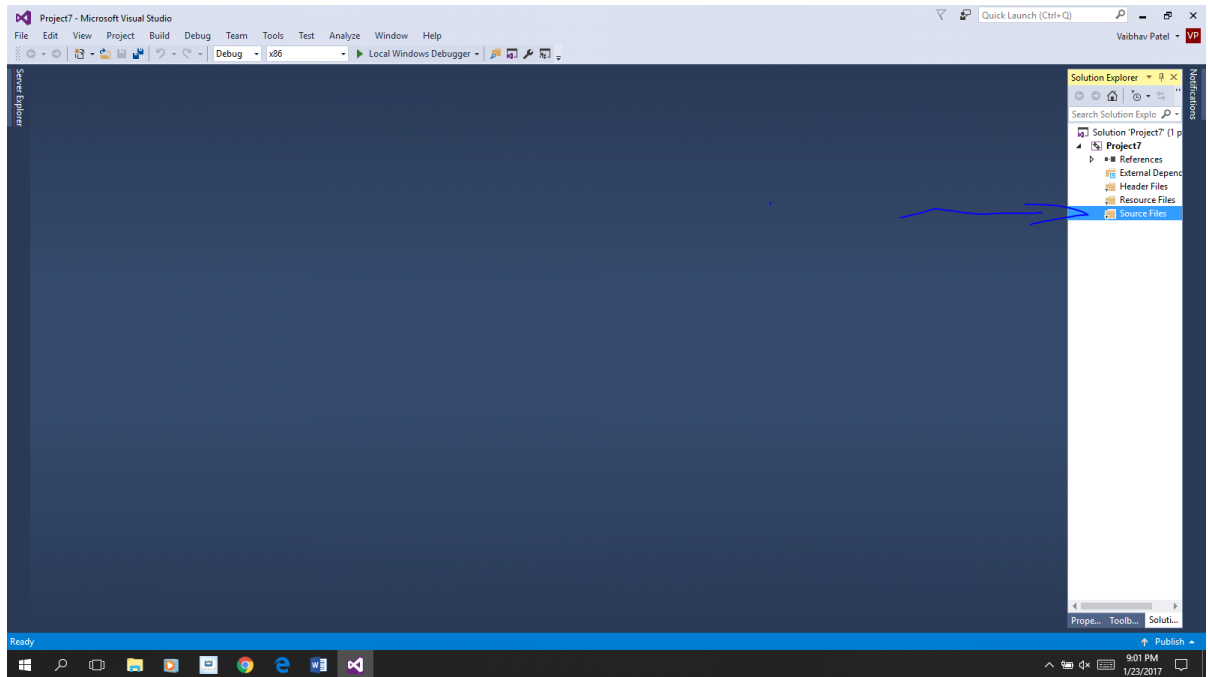

If program not running on this IDE or problem occurs.

- create empty c++ project on Visual Studio.

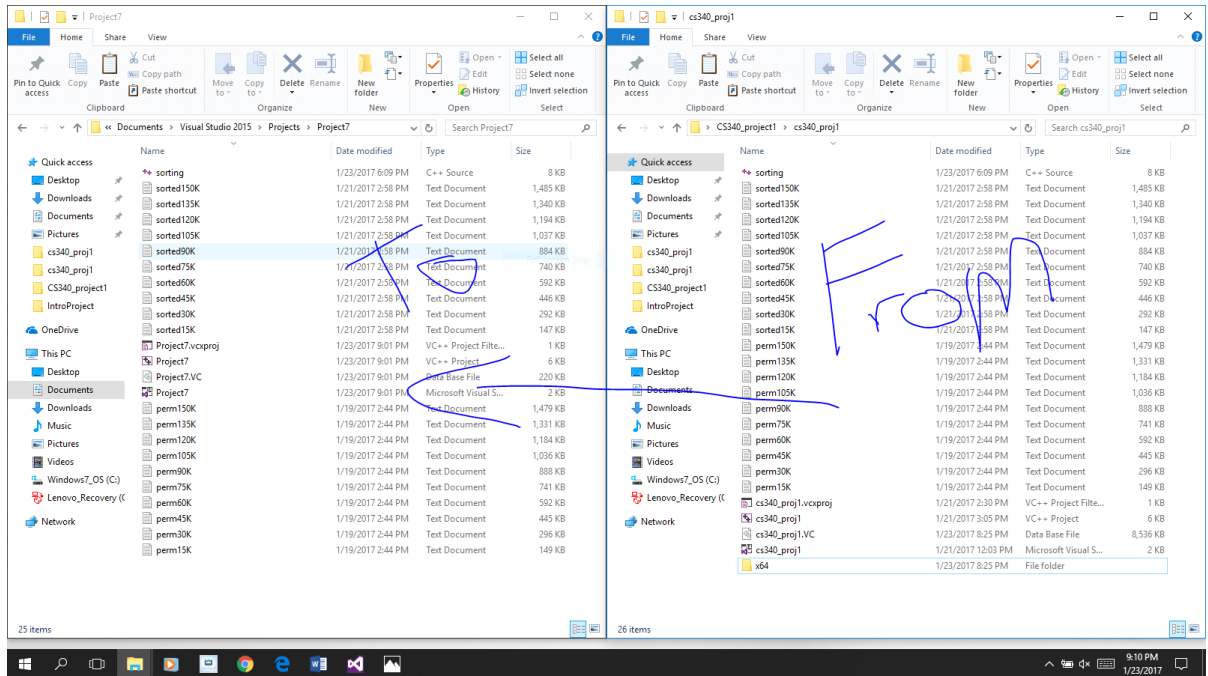

File -> New -> Project

- Now on the right you see this options in solution explorer.

- Right click on source Files then Add -> Existing Item.
- Go to Extracted folder which had sorting.cpp. add that file to source files.
- Now copy all 10 permuted files and 10 sorted files to project folder from extracted folder.
- Only copy .txt files.
- Project folder after adding all files will look like this.

- Now Run the new solution that is created. It will run fine.
